NEHA DANI DEBUTS NEW ART JEWELRY COLLECTION AT THE PALM BEACH SHOW

Internationally acclaimed artist showcases bejeweled masterpieces in her signature sculptural style as a first-time exhibitor

PALM BEACH, FL, January 18, 2022—[Neha Dani](#), internationally acclaimed jewelry artist known for her highly collectible works, will present her portfolio of exquisite and timeless jewels as a first-time exhibitor at the 19th annual [Palm Beach Show](#) held at the Palm Beach Convention Center. A new series of jewelry titled *La Pluma*, inspired by the freedom symbolized by bird wings, will be debuted at the fair alongside a variety of stunning collections from Neha's portfolio.

"I'm delighted to be at the Palm Beach Show this year—I can't think of a better place to debut my latest collection, *La Pluma*. The pieces are colorful and evoke the joy of our natural surroundings, which is very in line with Palm Beach and the vibrancy of this area. It's a pleasure to share my artistry with this incredible community of jewelry, art, and design collectors," said Neha Dani.

The Loriini Bracelet; Monal Earrings; Pero Bangle Bracelet

La Pluma was created from Neha's avian observations as she discovered a renewed sense of optimism in the resilience of nature and humanity. Drawing from the emotions of the past two turbulent years, the artist looked to the sky outside during lockdown and was taken with the birds in flight and vivid colors of their feathers.

The new series includes seven pieces—four pairs of earrings, two bracelets, and a ring—all intricately designed organic forms with deep jewel tones from emeralds, rubies, tanzanite, and amethyst. The works are made of titanium, and delicately crafted feathers form the ring

and bracelets. Each pair of earrings differently interprets the beauty of plumage or birds in flight with their sculptural forms soaring through the air or fluttering in free flow.

Also on view will be Neha's recent *Kephi* series including six rings, six pairs of earrings, one bracelet, and a statement pendant. The name is derived from the ancient Greek word "Kefi," which describes the process of discovering happiness, the spirit of joy, passion, enthusiasm, and overpowering emotion. The graceful designs of each piece of jewelry include curling and contouring shapes to create an orbiting flow of energy around bold and contrasting gemstones.

Kephi Ring in Teal Blue and Orange Sapphires; La Pluma Pavona Earrings

Both bodies of work encompass lyrical movement and the dual sense of femininity and strength to inspire and empower the wearer. Highly prized by collectors, Neha's work reflects the passion and deeply spiritual philosophy of the artist herself. Exuding fluidity and dynamism, each piece is inspired by a memory and feeling from the designer. The ornate pieces of art jewelry speak to Neha's endless creativity.

The magic of nature is an ever-present theme in Neha's work. Additional works that will be on display include the series *Shrishti*, *Glacier*, *Blossoming Flowers*, *Cadence*, *Tidal*, and *Architectural*—which were inspired by the natural wonders from stalactites to the poetic movement of ocean waves cresting and crashing. This assortment of rings, earrings, and bracelets was designed to be lightweight and perfectly at home on the body—each piece a wearable work of art.

Neha Dani Jewels will be on view at booth 733, where Neha will be available to speak to the new *La Pluma* collection as well as her design process. Further, Neha will speak in the Palm Beach Show Lecture Series alongside Karen Stone Talwar, Founder and CEO of Adventures in Art, on Sunday, February 20, 2022 at 4:00 PM ET in room 1BC. ABOUT NEHA DANI

Neha Dani's oeuvre, with its attention to detail and innovation of form, has made her one of the most compelling voices in the world of jewelry. Dani works much as a sculptor would, starting with a three-dimensional and individually carved wax model that she then refines to perfection. Notably, Dani pays as much attention to the stones she sources as she does to her

designs, scouring the world for the perfect gemstones, which she hand-selects for her creations. The stones are then set by master craftsmen using a combination of old-world techniques and modern technology to produce unique pieces of art-jewelry.

These multilayered sculptures speak to a deep intrinsic philosophy, inspired by the natural world and the human emotions that reside within each piece. Dani's designs tell a story from every angle, striking a delicate balance between feminine aesthetic and bold, dramatic scale. They exhibit an intricacy with forms, curves, and colors that are as exceptional as the women who wear these works of art.
